Motorized Screen

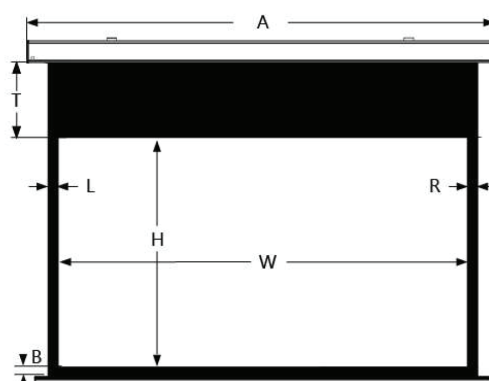

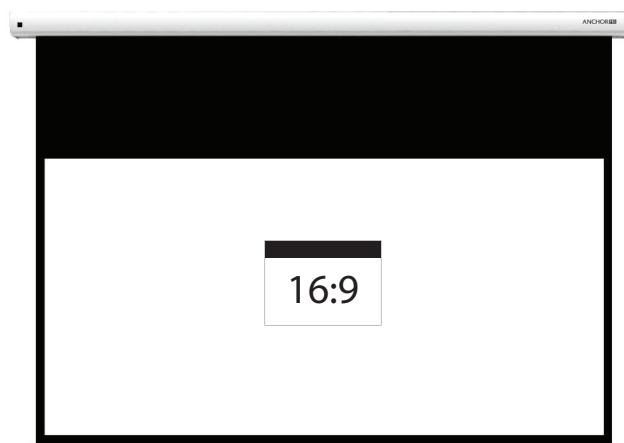

Supreme

Supreme

The Supreme screens use the tubular motor and the Motor in roller design guarantees the reliability of the screen for a very long duration. This screen uses a special rubber anti-noise and anti-vibration mechanism on the rollers. This greatly absorbs the vibrations and reduces the impact of motor vibrations effecting in a quiet and smooth operation. The motor remains durable and efficient even after tens of thousands of revolutions. Large diameter of the rollers ensures long-term screen integrity by providing a consistent flat projection surface. Screen fabric has a black border all around. Standard large upper black drop is 300mm for HD format Screens (16:9) and cinema screens (2.35:1). Custom Size black drop is also available as per order.

The Supreme screens are equipped with standard 3 button in-line switch. Different control system are available for this model, including RS232, Trigger and External IR .The Screen Fabric can be selected for various orders namely Matte White, High Contrast Grey etc.
