

Collaboration System

Wireless Presentation System for small to mid-sized meeting rooms, classrooms and huddle spaces.

TOUCH & SHARE

PLUG IN
SMART

“Bring your own device Collaboration
Simple and Secure”

Its simple operation makes “Touch & Share” the right choice for enterprise-wide deployment in meeting rooms and huddle spaces or in educational facilities or seminar hotels. You can rest assured that your content is secured while being transmitted wirelessly, due to the implementation of security standards.

“Touch & Share” comprises of a base unit and push dongle transmitters. Depending on the application, additional transmitters/dongles can be purchased as an option.

The dongle features a dual-color LED indicator to provide feedback about the activity status to the user.

“Touch & Share” DONGLE is the easy-to-use approach to collaboration.

Push and Share!

Using “Touch & Share” you can collaborate with other meeting participants, including guests, and present audiovisual content, even without any training.

Windows and Mac laptop users simply connect the “Touch & Share” Dongle Transmitter to the HDMI and USB port of their device.
